

AI-enabled modernization with Microsoft Azure and NTT DATA

Break through to business growth 30% faster with our application modernization and migration services.

From discovery to delivery, cloud-native AI modernization creates breakthrough business value

Wherever you are on your cloud journey, cloud-native architecture and AI should be playing a significant role in driving business growth and improving customer experiences.

Are you using these transformative capabilities to your advantage?

Transform your business

How does a business benefit from transformation with cloud-native architecture and AI?

- Accelerated development cycle
- More time to drive innovation
- Agile practices
- Improved customer response times

Early adopters and pioneers are leveraging AI and cloud modernization to transform their business and unlock a competitive advantage.

Leverage a proven cloud-journey framework

From discovery to delivery, NTT DATA will help you:

- Shape your technology, business and workforce strategies
- Follow best practices from the Cloud Adoption Framework for Azure
- Accelerate your modernization and cloud-adoption efforts using AI

Migrate to the future with confidence

Prepare | Assess | Deploy | Release

We help you plan for and migrate to Azure, often leveraging platform-as-a-service and low-code applications to:

- Speed up delivery
- Boost developer productivity
- Lower the total cost of ownership (TCO)

We ensure all migrated workloads are on the right clouds, at the right time, with the right architecture.

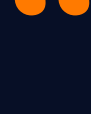

Optimize continuously

We set you up for long-term success by:

- Implementing tools and technologies for ongoing optimization and maintenance of cloud environments
- Delivering AI-enabled data insights
- Safeguarding your clouds, networks and applications with improved observability and security capabilities

We give you the confidence that your environments are always secure, always performing.

We're able to take advantage of the innovations that Azure offers us: a CI/CD development pipeline that accelerates our speed to market, elastic resource scaling, minimized downtime and zeroed on-premises hosting expense. Those are massive improvements and just the beginning of our journey to the cloud.

Shi International

Cloud-native and AI-enabled Modernization with Azure Services

Achieve breakthrough outcomes: improved agility, application performance and innovation.

Industry Cloud Platform

Leverage industry accelerators, blueprints and AI-enabled, component-based building blocks to bring industry-specific solutions to the market faster.

Site Reliability Engineering

Take operational excellence to the next level. Our SRE service includes devsecops for safeguarding your intellectual property from malicious actors and observability for complete visibility and monitoring of your entire IT environment.

Governance, risk and compliance

Take advantage of flexible and easy-to-implement governance, risk management and compliance (GRC) solutions. We offer seamless integration, robust reporting and analytics, eliminating anxiety and uncertainty from business operations and the compliance process.

Clients realize a 30% gain in speed to market, on average, with our application modernization and migration services.

Why Microsoft Azure

Azure Expert Manage Services Provider

25+ years of trusted partnership with Microsoft

25+ Microsoft accreditations, including Azure, AI, Data and Security

15,000+ Microsoft certifications

Industry solution online catalog with sector-specific functionality and building blocks for Azure environments

- With a comprehensive suite of tools and services for application modernization, Azure enables businesses to refactor, rearchitect or rebuild applications.
- The integration of Azure DevOps streamlines the development, testing and deployment processes, which supports a modern DevOps culture.
- Azure provides strong security and compliance throughout the application lifecycle, enabling you to confidently migrate sensitive workloads to the cloud while meeting regulatory requirements.

Why NTT DATA for Microsoft Azure

NTT DATA is named a Leader in the 2024 IDC MarketScape report for Worldwide Application Modernization Services to Azure

Client success stories

Wacom

A global leader in the pen display and tablet market for creative users

- Comprehensive migration and modernization — moved global SAP instances to Microsoft Azure including 30 Windows services and SQL database instances
- Reduced opex and capex
- Payback in 2 years + 41.5% ROI by year 5

European DataWarehouse

A market infrastructure recognized by the European Securities and Markets Authority and the UK Financial Conduct Authority

- Modernized IT with Microsoft Azure and NTT DATA cloud services reducing operating costs by up to 25%

SHI International

An \$11 billion provider of technology products and services

- Modernized their ecommerce application by migrating 35 microservices to Microsoft Azure with 100% uptime
- Automated workflows and reduced app deployment time from hours to minutes

ISG

A global construction services company

- Modernized IT by migrating business-critical apps and data to Microsoft Azure with 100% uptime
- New applications now deployed in just 3 weeks
- 350% improvement in time to provision a new infrastructure

We've got you covered with Microsoft accreditations for modernization and migration
